This is the way that Beta and Theta wave influence your capacity to bring in cash:

Beta wave

It is also known as a slave wave. The creator of The Billionaire Brain Wave states that beta waves link to daily routine activities, such as tasks, pressure, and luck. It is a result of the negative conviction that prevents you in achieving your financial targets.

Theta wave

It is often referred to as the billionaire brain wave since it helps you unlock your capacity to be rich. These frequencies aid in accessing the subconscious mind. They also enhance the ability to heal, intuition as well as a sense of joy. The stimulation of theta waves enhances cognition as well as memory. Billionaire Brain Wave uses sound waves to trigger theta waves. Theta waves occur during deep tranquility, meditation, or sleep. The waves reach your subconscious mind which manages your emotional habits and also has limited belief systems.

Theta-based sound waves target the hippocampus part of the brain. It is vital in memory, learning, and logical thinking. The hippocampus is then wired to the brain's neurons to draw prosperity and wealth.

Based on research, those who grew up in poverty are likely to have a smaller hippocampus. When the hippocampus of your child is tiny it is unable to produce many beta waves that cause greater limiting views.

Theta-based sound waves cause the brain's hippocampus to expand 6 times faster. This stimulates the billionaire brain wave. When you hear it for the first time, the Billionaire's Brain Wave is triggered by three simultaneous frequencies of sound. The sound frequency has nine decimal places.

The sounds in The Billionaire Brain Wave improve problem-solving and creativity, helping you achieve financial goals. The Billionaire Brain Wave encourages personal development and helps you unlock your potential.
