What's the Process of the Billionaire Brain Wave?

The Billionaire Brain Waves program works by turning on your billionaire brain wave, which enables you to create deep connections, attract the wealth you want, lose weight easily, and open up new doors in your life.

Only two of the brain's four major waves, according to the official website, are relevant to identifying your current state of affairs. The Beta and Theta Waves are those. The beta brain wave is primarily linked to daily living, including stress, bad luck, and how busy you are. Since many workers are in beta mode, it is overactive in

their lives and is where the majority of your limiting beliefs are located. Researchers refer to beta as "the slave wave."

Theta waves, on the other hand, are the polar opposite of beta waves. It is the entryway to abundance, good fortune, health, and money. Theta is the predominant wave for sensations of happiness, creativity, effortless learning, and intuitive insights. The "Billionaire Brain Wave" is so-called by scientists because it can increase your brainpower by 50%.

You should be aware that theta, the wave that draws riches and success into your life, can only be fueled by the hippocampus, a little area of the brain about the size of a walnut. You'll generate more theta waves if your hippocampus is larger.

You will produce more slave waves and tiny billionaire brain waves if your hippocampus is small, which will make it challenging to realize your aspirations. You need a bigger, thicker hippocampus to solve your difficulties with money, health, and relationships.
